Mr. Richard Palmer, P.E.
Northeast Remsco Construction, Inc.
1433 Hooper Avenue, Suite 121
Toms River, NJ 08753

Subject: Westchester County
Repair of Saw Mill Valley Trunk Sewer (Main Line)
Route 119 and Saw Mill Parkway, Elmsford New York

Dear Mr. Palmer:

The County of Westchester's (County) major trunk sewer referenced above had collapsed and was in need of expedited repair through slip lining while it remained in operation. Northeast Remsco Construction (Northeast) was the low bidder on the project and quickly came up to speed on the project by understanding the constraints associated with working in two state roadways with numerous utilities that had to remain in service with little to no impact on traffic flow. Northeast worked hand in hand with CDM and the County to expedite the schedule, while addressing field changes such as a bend in the pipe that required the addition of a third access pit to complete the project. Northeast was fair with field change costs, working with CDM and the County to address the budget constraints of the project while providing the County with an excellent product at the end of the project. Northeast management and field staff were extremely knowledgeable in the construction techniques required to successfully complete the project on time and under budget.

The County and CDM appreciated Northeast's effort in expediting the work and CDM looks forward to working with Northeast on future projects in the same cooperative manner.

Very truly yours,

Keith F. Kelly, P.E.
Vice President
Camp Dresser & McKee
